COMPLETE REFERENCE LIST

The staff of Data Processing Digest regularly monitors nearly 200 computer, trade, educational, scientific, and business management periodicals for appropriate articles to digest each month. Every June issue and the year end annual supplement include all the publishers' addresses for your convenience. During other months of the year, only the periodicals referenced in that issue are given. All addresses which do not include a country are in the U.S.

Please request copies of originals from the publisher of the periodical. Do not write to Data Processing Digest, as we do not copy or reprint, and your request would be delayed. Books should be ordered from their publishers or from a local technical book store.
